POVTORNO

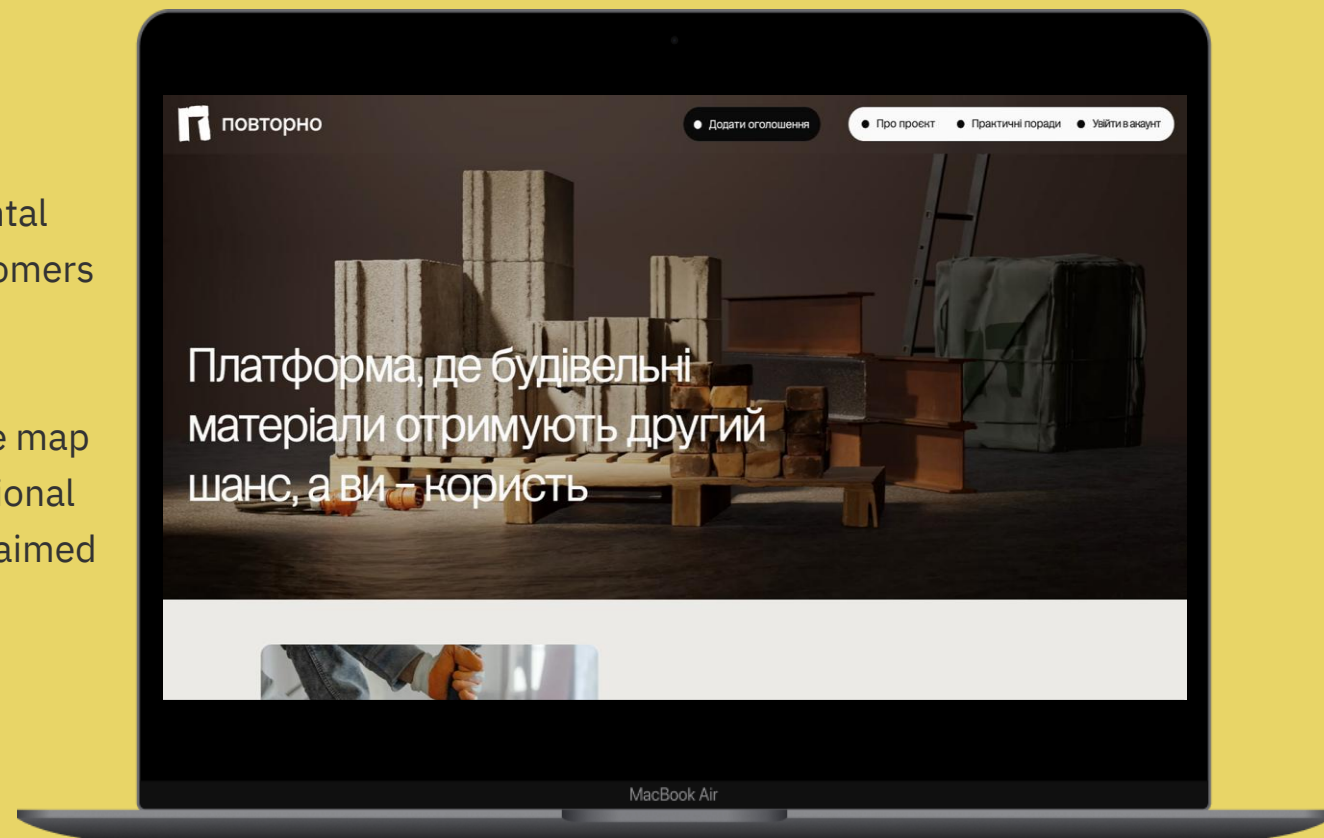

- Supported by Embassy of the Netherlands in Ukraine
- Launched in October, 2024

POVTORNO is an online platform that reduces the environmental impact of construction projects in Ukraine by connecting customers with suppliers of reclaimed materials, including war debris

The platform offers a user-friendly marketplace, an interactive map for locating nearby materials to optimize logistics, and educational resources to guide professionals in effectively integrating reclaimed materials.

S3 RECONSTRUCTION
OF UKRAINE

- Supported by Government of the United Kingdom
- Launched in August, 2024
- Final conference scheduled for March 19-20 in Lviv, Ukraine

Safe, Sustainable, and Swift Reconstruction of Ukraine

An innovative project dedicated to the sustainable reconstruction of Ukraine through the development of low-energy "Green Building Materials" technologies. By upcycling rubble generated during the Russian invasion, we aim to transform debris into valuable construction materials while addressing the complex challenges posed by hazardous substances like asbestos and non-traditional concrete.
